

The table below shows the traffic going between the customer's network.

- If the traffic from the customer's network is permitted is required in most cases no changes in the customer's firewall.

- Any SIP Inspection (SIP control) in the firewall must be removed for traffic to / from the service.

These destinations and protocols must be allowed for each direction, ie inside out and outside-in as specified below.

From inside and out

To IP(s)	Dest port	Protocol	Transport	Roles	Comments
85.8.47.192/27		80	HTTP	TCP	Accept
85.8.47.192/27		443	HTTPS	TCP	Accept
85.8.47.192/27		5060 & 5061	SIP	TCP	Accept SIP-
inspection in the firewall must be taken away					
85.8.47.192/27		49152-65534	RTP/RTCP	UDP	Accept Media-
(voice-)traffic					
85.8.47.192/27		123	NTP	UDP	Accept
85.8.47.192/27		514	syslog	UDP	Accept

From outside and in

Från IP(s)	Dest port	Protocol	Transport	Roles	Comments
